Custom Manufactured

Custom built exhibits are hand crafted displays unique to each user. Manufactured with timber, aluminium and steel they are born from a concept line drawing and transformed into a working environment in a matter of days by master craftsmen such as Carpenters, Cabinet makers and Metal fabricators. Typical finishes for these types of display are paint and laminate, some incorporating lightboxes, large format graphics... and occasionally, some shrubbery!!

An exhibition is a market environment bringing competing companies together in a common cause to promote their industry. For the consumer, they have seen your web site, they have your brochure now they want to meet you and view your product, and if you don't have a sales outlet on every corner, how better to get to your customers?

Do you have a display problem? ... FACE it!
