Signs

## Signcode™ Sign System

Signcode™ is the variant connector system with clip locking made of silver anodised aluminium profiles.

Thanks to the clever design, the exchange of information is quick and easy. Signcode™ is available in a variety of sizes, both single and double sided, as wall, flag or ceiling signs.

### Signcode Flag

Signcode Ceiling

Signcode Wall

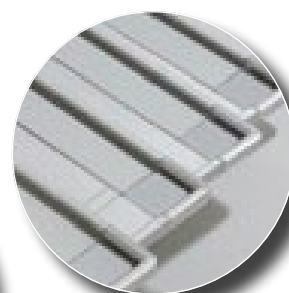

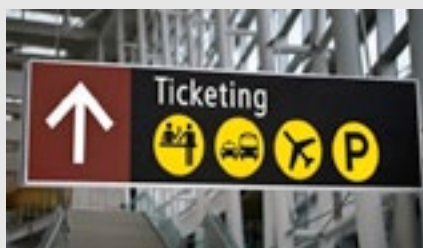

The interchangeable sign inserts can be made from a range of substrates including sheet metal, composites and acrylic. A beveled and discrete 4mm frame and the silver plated die-cast metal edge connectors make your signcode a variable yet elegant eye-catcher.

Ideal for use in locations that require

changeable signage, such as Strata buildings, Conference venues and "Pop Up" Shop destinations.

### Signcode double sided
